Kellogg Community College Pre-Medicine & Pre-Dentistry (Biology/Biochemistry/Chemistry, B.S.)

This transfer guide is for students whose objective is to be admitted into a medical or dental school. Although the choice of major is not restricted, most pre-medical & pre-dental students graduate with a bachelor's degree in **Biology, Biochemistry, or Chemistry**. These majors provide the necessary prerequisites for medical school and ensure the student has a strong science background. Students are assigned to an advisor who assists them with the selection of courses required or recommended for admission into medical school or dental school. More information regarding NMU's pre-professional programs can be found at: <http://www.nmu.edu/departments/interdisciplinary/preprofessional/>

Note: While at the community college, students are encouraged to maintain a strong grade point average (3.50 or higher), spend several hours of observation with a physician, and volunteer many hours in health related settings.
