
Instructional Information

General Education Core Outcomes

Kellogg Community College believes in the value of general education and to that end, all students receiving an associate degree will be required to achieve General Education Core Outcomes. These outcomes will be acquired through the completion of general education core courses required for each degree (see specific program guides).

As a result of completing an associate degree from Kellogg Community College, students will be able to:

1. Demonstrate writing, listening, computer, verbal, and non-verbal communication skills.
2. Demonstrate critical thinking skills in gathering, analyzing, interpreting facts, and problem solving using scientific inquiry.
3. Demonstrate knowledge of the creative process and the ability to appraise the significance of visual, literary, or performing arts.
4. Evaluate the implications of being a citizen in a global community.
5. Distinguish between the positive and negative implications of physical, mental, and community health principles on individual and community wellness.

During the spring semester of each academic year, randomly selected students are asked to take a general education learning outcomes assessment in one of six areas: Communicating, Creativity, Critical Thinking, Global Awareness, Healthy Living, or Reading. The data gleaned from the results of these assessments assists the administration and faculty of KCC in improving the quality of student learning.

Academic Discipline Procedure

Procedures in cases of academic integrity infractions will begin with the individual instructor who has reason to believe an incident has occurred. The instructor must first review the information and determine whether there is sufficient reason to proceed with the charge of academic integrity violation. If the instructor determines to proceed, the instructor must communicate, in writing, the charge to the student with a copy to the instructor's chair or director.

If the student admits his or her guilt and accepts and completes the penalty prescribed by the instructor, the matter is resolved, and a copy of the incident report detailing the allegations, the student's response, and the penalty must be sent to and filed with the appropriate chair or director and the Dean of Student Services office. Penalties imposed by the instructor fall within the confines of the course, i.e., failure of the assignment, requirement of an alternate assignment, or failure of the course. Dismissal from the program or suspension from the College are actions outside of the instructor's purview and must be dealt with by the appropriate department chair or director. KCC's Policy on Academic Integrity is spelled out in the Student Handbook.

If the student maintains his or her innocence, the instructor will apply the penalty and refer the student to the appropriate chair or director who shall process the matter as a student appealed violation of the Student Code of Conduct.

Class Attendance

Regular class attendance is considered an essential part of your educational experience and a requirement for an adequate evaluation

of student academic progress. Absenteeism is a matter to be resolved between you and the instructor.

Excessive absence is reported to the academic advising staff. An attempt is made to contact you to resolve any problems. Continued absenteeism may lead to administrative action.

Faculty are required to report “No Show” students to the Financial Aid office. Federal aid may be reduced if you do not begin attendance in all classes.

Consultation

If you need to meet with a member of the faculty concerning a class, you are encouraged to do so. Generally, members of the full-time teaching faculty are available approximately seven and a half hours a week. We urge you to seek help with small problems before they grow.

Consultation hours are posted on office doors and usually are announced in class. Appointments are recommended.

Academic Assistance

The Learning Place

The Learning Place fosters student success by providing comprehensive academic skills support and services in college-level and developmental learning. Students can improve their learning through peer tutoring, professional academic assistance, career advice, and self-help resources. The Learning Place staff offer reading, writing, and mathematics assistance during open hours, as well as during scheduled labs. Students can receive help with homework, lab assignments, and other projects. (For assistance in science tutoring, students should stop into the Schwarz Science Building, room 103D.)

The tutor coordinator, student support specialists, peer advisors, and academic paraprofessionals, as well as The Learning Place Director, are available to help assure student success. Computers, academic software, study group spaces, and professional assistance are available to all students in the Ohm Information Technology Center, room 207.

Reading, Writing, Mathematics and Study Skills

Kellogg Community College offers a wide variety of individualized refresher and mastery programs of study in reading, writing, mathematics, and study skills.

College Reading and Study Skills (STSK 98 or 99) offers help with reading comprehension, vocabulary, lecture note taking, memory, time management skills, and test taking skills.

The Writing Skills course (ENGL 97 or 99) increases student proficiency in paragraph development, sentence structure, mechanics, and grammar.

Mathematics Clinic (MATH 98) offers a review of basic mathematics by targeting the skills needed to be successful with everyday mathematical tasks.

The goal of developmental instruction is to help under prepared students develop skills that will allow them to proceed to and succeed in further levels of English, mathematics, and other subjects they need to achieve their academic goals.

In the event you score 45 or below on the COMPASS reading test, you will be asked to take an additional assessment test. If the test results confirm you do not meet the minimum score to be successful in developmental course work at KCC, you will be referred to appropriate community sources.°

If you have been admitted to the developmental program and are assessed below seventh grade reading level on two or more appropriate assessment tests, you will be administratively withdrawn by the center coordinator and referred back to the Academic Advising Center for other kinds of help.

Learning Opportunities

Customized Training for Business and Industry

The KCC Customized Training department supplies customers with job-related educational training, skills, and technical services, significantly improving their ability to compete and grow in a local, national, and global market. We deliver these services when and where our customers need them, maximizing our customers' benefit-to-cost ratio.

We help our customers assess the skill needs of their employees, then design training uniquely tailored to fit their needs. We also deliver training to meet customer needs, at anytime. We are committed to deliver training on-site at our customers' facilities or at another location of their choosing.

Our courses produce results and have been delivered to dozens of businesses and other entities in Barry, Branch, and Calhoun Counties. For further information regarding customized training courses, contact the Director of Customized Training at the RMTc, 269-965-4137, ext. 2847.

Distance Learning

Online Courses

Many traditional courses are now available in an online format, where assignments, activities, and communication are all done on-line. Though some tests are completed online, most courses require you to take at least one or two tests at a proctored site. On-line courses are also available from other Michigan community colleges through the Michigan Community College Virtual Learning Collaborative (MCCVLC). Even though you

are taking the course from another college, you still receive support services from and maintain your academic record at KCC.

Interactive TV Courses

Kellogg Community College uses videoconferencing technology to link classrooms at multiple sites into a shared, video-connected classroom. With these facilities participants at one site can be seen and heard by participants at all other sites. The system also distributes images of computer screens, images of documents or objects, and video images. These facilities make it possible to expand our offerings at various sites by combining the students from several locations into one, interactive classroom.

Independent Study

If a course is not offered at a time when you need it for graduation, or if a specialty course is listed in the catalog, but has not been offered, you may request to earn the credits through independent study options. You will work with an instructor to gain the required competencies and learning outcomes; however, the work will be done independent of lecture or typical instruction. You must be prepared to learn on your own with the instructor as a coach only. The independent study agreement must be approved by the faculty and department chair.

Individualized Instruction

The benefits of individualized instruction are flexibility and convenience. Students use this mode of learning primarily for skill building courses in office or skilled trade fields. Students engage in the course work independently of each other under the guidance of an instructor. The students use print, audio-video, or computer-based information sources as their primary cognitive learning materials. The focus is on performing activities, normally in a lab environment, that reinforce the skills explained or presented in the

learning materials. Instructors in the lab work individually with, and provide feedback to, students to overcome any hurdles to learning. The labs are open many hours to make it easy to fit individualized instruction into the toughest schedules.

Learning Communities

A learning community is an innovative approach to learning that links and integrates two or more courses. Disciplines are taught together, for example, Freshman Composition and Art History. In this pairing students write about art. The same group of students, faculty, and an advisor work collaboratively in a friendly, supportive atmosphere, which may include special workshops and field trips.

Student-teacher interaction creates a closely-knit, supportive community of learners. Students begin to see the connections between the courses and develop knowledge on a broad range of subjects. As active, progressive learners in linked courses or learning communities, students gain confidence and communication skills, becoming better lifelong students.

Lecture-Based Learning

You will typically learn through this method of instruction which consists of lecture, group work, lab projects, and other traditional types of activities. Most courses are taught through this type of instructor-student interaction model. However, lecture-based learning can be supplemented with online components.

Short Courses, Seminars, and Workshops

Kellogg Community College's Lifelong Learning develops offerings based on market needs, national trends, and input from the community. A variety of programs and courses are offered each semester through Lifelong Learning for personal enrichment and

skill development and the Professional Development Institute for continuing professional education, employment retraining, skill upgrades, and nationally-recognized certification programs. A wide variety of online courses are also available for personal development and professional career certification. Contact Corporate and Community Services at 269-965-4134 for more information.

Small Group Option

When a class has low enrollment, but an instructor is willing to teach it on the basis of meeting half or more of the designated time and develop additional independent work for students, the Small Group Option may be offered to those students enrolled in the class. This option allows you the choices of dropping the class and re-enrolling in a different semester or taking the class in a "small group," which means the class will meet half or more of the scheduled time, and independent study projects will be required for the rest of the class time.

Learning Resource Center

The Emory W. Morris Learning Resource Center provides support for student research and learning needs. Open over 65 hours per week, evening and weekend services are available.

Resources Available

The staff of the Learning Resource Center encourage you to seek their support in locating the best information available for research and learning needs. A collection of over 60,000 book and media titles is accessed through the online catalog. To further assist you in gaining information research skills, orientations are held for classes.

The Learning Resource Center participates in the Online Computer Library Center (OCLC) and other interlibrary loan programs to obtain information that the College does

not own. The Reference/Information Desk staff assist users in linking up with these external resources.

A statewide database of e-journals and e-books provides students with access to needed research materials. Students can use the materials in other Michigan libraries by participating in the State's MeLCat and MichiCard library access program, available in the Learning Resource Center.

Centers

Kellogg Community College has four academic centers: the Grahl Center in Coldwater, the Fehsenfeld Center in Hastings, the Regional Manufacturing Technology Center in Battle Creek, and the Eastern Academic Center in Albion. The Eastern Academic, Fehsenfeld, and Grahl Centers provide transfer and applied degree courses, as well as academic and financial aid advising, payment opportunities, and bookstore services (only online bookstore services are available at the Grahl and Fehsenfeld Centers). For your convenience, the centers are open days and evenings.

At the Grahl Center, five different options are available: Associates in Early Childhood Education, Business Management, Arts, Science and General Studies. Check with advisors for information about these evening degree offerings and completing these degrees in three years.
