Michigan New Jobs Training Program
The MNJTP authorizes community colleges to contract with employers that are creating new jobs and/or expanding operations in Michigan. With this program, the cost associated with training workers for qualifying new positions is funded by diverting the new employees’ state income taxes. In effect, the training is paid with the funds that would have otherwise been paid to the state.

Skilled Trades Training Fund
The STTF will provide competitive awards for the development and implementation of employer-responsive training that will enhance skills, incomes, productivity, and employment retention, while increasing the quality and competitiveness of Michigan’s businesses.

TAACCCT
Through this job readiness program, Workforce Solutions will prepare individuals for employment by providing certification-based training focused on developing the workplace and technical competencies required for entry-level positions.

EDGE Program
The EDGE program is a job readiness program designed to provide economically disadvantaged workers with the work and technical skills demanded by great employers. Workforce Solutions partners with area businesses to develop a customized training curriculum. Participants successfully completing the program will be placed in permanent jobs with the participating organization.
